EOLE WINS THE HANDICAP. THE BIG HORSE RUNNING A GOOD RACE WITH 128

POUNDS UP.

The most important and interesting of the him, but none of them showed sufficient speed at any time to endanger the success of Mr. Gebnard's horse. The track was heavy and sticky from the recent rains, and this embarrassed Renegade more than any of the others. Eole is rather fond of heavy tracks than otherwise, and is a remarkable "mud" horse, while Renegade cannot fairly extend himself unless the course is in good

The first race proved the prize of the favorite. Duplex. Mr. Pineus gave the two-year-olds in the second race about the worst start possible-and the possibilities in is case are appailing. Laura Gould, a big, handsome cheatnut filly, owned by J. T. Williams, won, after a bard struggle in the homestretch. Heel-and-Toe, after many failures, scored a success at last, winning the two year-old handiens. The favorite, Mr. Keily's colt Thur-, however, was almost left at the post. Old Keno wa first in the seiling race, the favorite, Antrim, running unkindly. The Billow Stakes for gentlemen riders fell to C. D. Hoimes, who rode Rochester. The burdle race was captured by the outsider, Woodcraft, the favorite, Buster, being ridden without judgment or skill,

The attendance was large and the sport proved enjoyable though not sensational. It may be noted to the credit of the management and the transportation that visitors to the course now get home in good aca the races being run more promptly than before and trains and boats being nandled with more energy.

WHAT A PUSHING LOCOMOTIVE DID.

Two Pennsylvania Railroad freight trains were in collision at 6:20 o'clock yesterday evening in the deep cut near the Point of Rocks, Jersey City. Locomotive No. 960, T. M. Holland engineer, with eighteen cars, was rounding the curve at that point to go on the trestlework leading into Harsimus Cove. At the same time an outward-bound train, to go on the trestlework leading into Harsings Cove. At the same time an outward-bound train, consisting of thirty-six cars and two locomotives, one in front and the other in the rear, reached the junction at Baldwin-ave, which crosses the cut. The forward locomotive, which was No. 629, crashed into the second car of the inward bound train, wrecking twelve cars and itself. H. Green, the engineer of No. 629, and the fireman jumped off when they saw that a collision was inevitable and escaped without injury. Green saw the red disc, the signal that the track was not clear, and reversed his engine, but the locomotive in the rear kept pushing ahead uncil the train crashed into the other one. There was no one injured. Seven of the freight cars were completely wrecked, and their contents, which consisted of lime, hops and a miscellaneous assortment of freight, were scattered over the tracks. Five other cars were bally damaged.

As the passenger trains run through the new cut, which is south of the junction, passenger travel was not delayed for more than about ten minutes. The damage will probably amount to \$20,000.

THURSDAY, July 26-P. M. The Stock Exchange market in all of its depart ments to-day developed little or nothing more than a local trading for small profits or small losses. The transactions in stocks amounted only to 204,417 shares. Inspired by the seeming actions of the market's leaders, the early disposition of the average trader was to buy for a quick turn. The later disposition to accept a small loss was tempered by the hope that the leaders will mark higher prices to-morrow, because it so evidently is for their interest to do so. Those are the entire facts relating to to-day's stock market. Rumors and reports, either good or bad, were unusually scarce. Following a dull and steady open ing, there was so good an advance in figures that the universal expression was, "The market is wonderfully strong." Nevertheless there was all the time an indication of feverishness and unstability in the situation, which was only developed when the early buyers attempted to realize before the market closed. Call it a brokers' market, with the final gains and losses so small that neither "bulls' nor "bears" can brag over the day's results, and

the day's operations are put into a nut-shell. Government bonds were quiet, but the bids for the 4s were anyanced is per cent. Annexed are the

The feature of the market for State bonds was a demand for the Arkansas 7s issued to the railroads: Fort Smiths sold at 51 against 40 the last sale. Tennessee 6s sold at 387s and compromise at 4314@ 4318. Of city bank stocks American Exchange sold at 128 and Park at 175.

Railroad bonds were unusually dull; but no disposition was shown to hammer prices for effect on the share speculation. The last experiment of that character proved to be as expensive as it was foolish. The public of to-day is making a greater discrimination than the public of a few years back did between the values of mortgage bonds and the proprietary stocks of the same company. It is possible, and it frequently is true, that the first mortgage bonds of a corporation are a good investment at the ruling prices, while the stock of the same company may have no other

value than that which is a possibility of the future. To-day Eric consols were steady at 95%, New-York,

value than that which is a possibility of the future. To-day Eric consols were steady at 95%. New-York, Chicago and St. Louis firsts held their own at 101, and West Shore and Buffalo 5s were steady at about 76. East Tennessee, Virginia and Georgia incomes were up 1½ to 34½, and Richmond and Danville debentures were oft ½ at 67½. Long Island consolidated 5s sold at 100, and International and Great Northern consolidated 6s sold at 86. Central and Hudson consol 7s were down to 128. Northwestern debenture 5s sold at 98%, and Rock Island 6s were down to 124. Texas and Pacific incomes, after 60¼, were ¾ higher at 60, and firsts, Rio Grande division, were up from 83 to 83½ 83%. Northern Pacific firsts were strong up to 104%.

The Sub-Treasury to-day lost on balance \$202, 243, made up by losses of \$57,886 currency and \$144,457 coin. The day's transactions covered: Receipts, \$2,225,909; payments, \$2,428,252; currency balance, \$7,547,248; coin balance \$117,235,195. The local money market is still abundantly supplied, and to-only rates ruled at about 2 per cent. The domestic exchanges are unchanged.

The Clapting-House statement to-day was as follows: Exchanges, \$95,712,740; balances, \$3,870-470.

The United States Treasury at Washington to-day received \$424,000 National bauk notes for redemption. The customs receipts \$232,730.

The foreign exchanges present no features; the business other than the absorption by bankers of such commercial bills as are made is small and rates are steady for transactions as follows: Bankers' bills, \$4,83¼ and \$4,87 for long and short sterling respectively; 5,22¼ and 5,19 for fraces; 94¼ and 95 for renemarks; 39% and 40½ for guildiers.

The Governors of the Bank of England at their regular weekly meeting to-day made no change in the bank's minimum rate for discount, and it remains at 4 per cent. During the week the bank gained £6,000 bullion on balance. The weekly statement of the Bank of France shows losses of 300,000 francs gold and 1,100,000 francs silver. The statement of the Imperial Ba London ruled at the high figure of 25,3012 francs to

PROVISIONS, CORN AND WHEAT AFFECTED BY YEL-LOW FEVER RUMORS-AID FOR THE TELEGRAPH OPERATORS. INT TELEGRAPH TO THE TRIBUNE.!

CHICAGO July 26,-The appearance at each morning in the local newspapers of dispatches from three or four Southern cities announcing the arrival of vessels with yellow fever abourd has made the provision dealers nervous and ready to take alarm at even the silliest rumors. Pork dropped 40 cents a barrel, lard and short ribs 15 20 cents a bundred pounds. Fairbank appeared to be a seller of lard and this hastened the decline. The people who stand next in dread of the yellow fever pest and who apparently are easiest affected by the rumors concerning it are the packers and rich provision shippers, not the inconsequential speculative camp followers, the jelement usually first to be thrown into panic, but whose stampede is of little moment. Armour has instructed all his Southern correspondents to telegraph him at once any new facts concerning the pest, yet whenever a rumor is set affoat, no matter
